

1981 to 2010 Normals - NEW NUMBERS

(These are the NCDC Rerun 1981-2010 Numbers)

The new 30 year normals shown below will be used in daily and monthly climate data beginning on Monday, August 1st. The 1981 to 2010 Normals show warmer temperatures, as the 'cold decade' of 1971 to 1980 cycles off and the 'warm decade' of 2001 to 2010 is added to the 30 Year average. The 30 Year normal began with the 1931 to 1960 data set, by international agreement, and are issued once every 10 years to update the ongoing changes in the climate system.
